

Appendix 4; Fishing gear plans *San Aotea II* as specified in CM 22-06; Annex 22-06/A Par 1.2.1

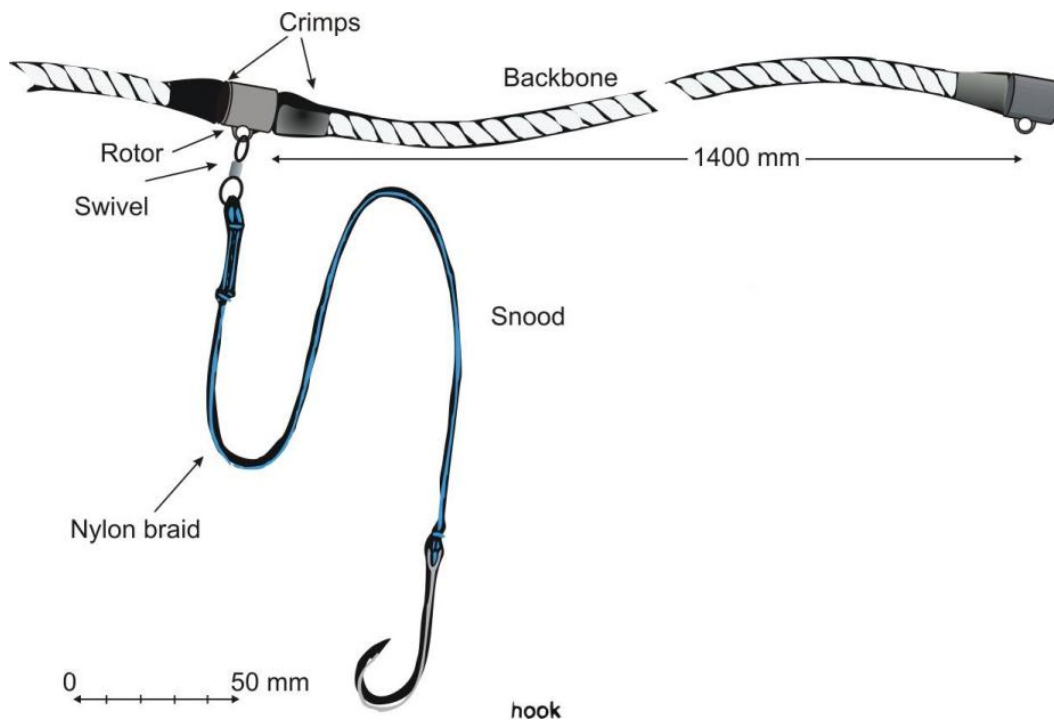

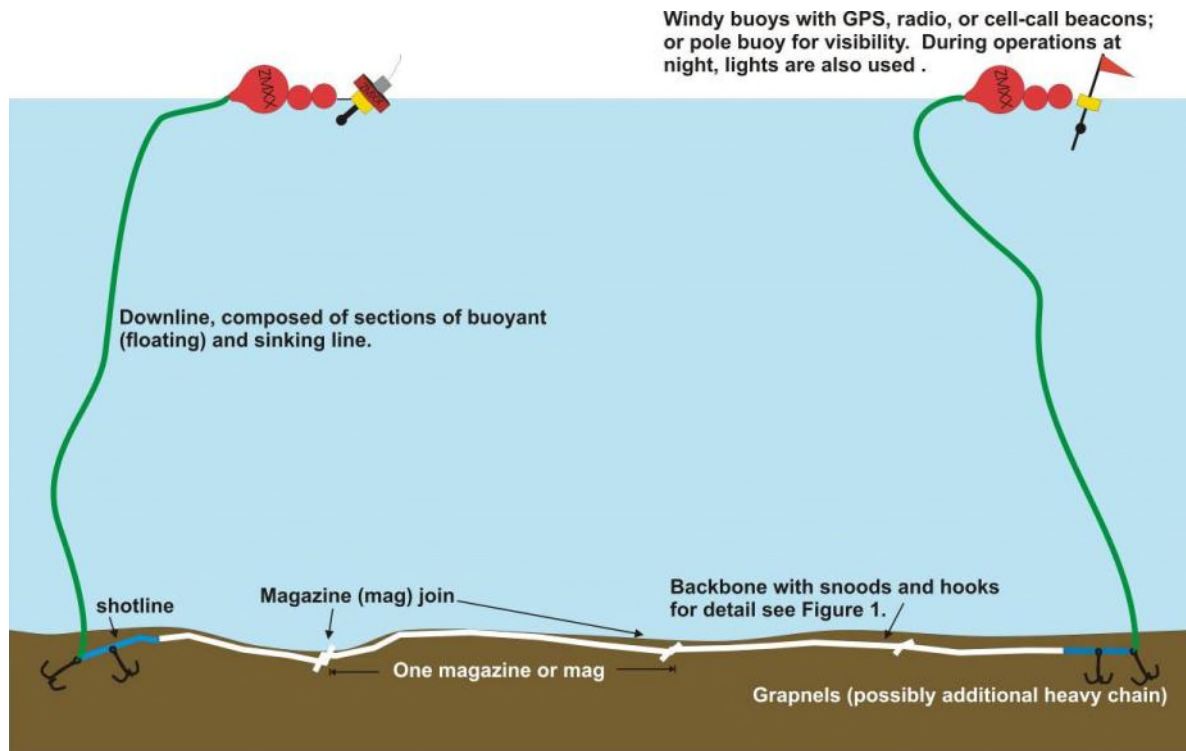

Table 3. Ranges of line lengths and hook numbers from *San Aotea II* records averaged over the past three completed fishing seasons in Subarea 88.1.

	Minimum	Average	Maximum
--	---------	---------	---------

Line length	3,450 m	6,736 m	10,350 m
Number of hooks	4,830	9,430	14,490

Table 4. Description of main gear items

Item	Description
Backbone	11.5mm lead-core internally weighted polypropylene/nylon line at 50g/m (Mustad AS)
Grapnels	40 or 50 kg - two or four used per line depending on sea, bottom, and tidal conditions
Weights	About 5 kg - rarely used, tied to the line occasionally when setting in loose sea ice or when turning while setting
Hook type	15mm straight shank 15/O hooks (Fiskevegn AS)
Chain	Lengths of heavy chain generally 20 or 40 kg used for additional weighting at the line ends.
Floats	Only surface floats, either inflatable or pressure floats depending on ice conditions
Snoods	45-50cm blue Capron™ snoods spaced at 1400 mm
